**Importance:** High

Bernice

I made a number of modifications to the slides – some slides may not seem different (like first or last) but I did make some revision to the graphic or size of text, and add a logo where appropriate.

The photos really need to reflect the text so I changed a few to better fit the slide as you'll see (they are all taken in NEPs). Along those lines you'll notice the density image which better conveys the core stressor and I added emerging contaminants since they are indeed a challenge as NOAA and FWS would agree.

And importantly, I had to provide the photo credit so please use these in here. I was given permission to use the photos I've sent you if I provide the credit so will need to

provide that if you change to other photos I previously inserted in earlier versions.

I also feel strongly that if we are telling our story, we need to convey all the message bullets on slide 12. If you cut it short you are not giving them a complete picture of the NEP and why it is successful in my opinion. If you provide the slides to the Hill staffers, even more important to include those then expect they will retain the ideas by you telling them verbally.

Thanks for asking us to take another look – hope this was helpful.

**Subject:** REVISED SLIDES FOR CAUCUS-- FOR YOUR REVIEW

Hi Team. Here are abbreviated slides for your further review. Vince, thanks for the Santa Monica example. Nancy would you please help me shrink the NEP map to better fit the slide. Thanks to you all for your assistance!
